1	Fabrication, Installation and Precommissioning of Njaba Pipelines Ends (Process) Facilities.	<ul style="list-style-type: none"> Carry out site survey as per work scope. Carry out Community settlement. Mobilize to site all necessary Equipment / tools and Personnel. Fabrication and Installation of production, test and gas-lift manifolds at Njaba location as per attached drawing. Fabrication and Installation of Production Pig Launcher and Gaslift Pig Receiver at Njaba location as per attached drawing. Fabrication and Installation of all associated piping and instrumentation to connect the launcher and the production manifold at Njaba location as per drawing Fabrication and Installation of all associated piping and instrumentation to connect the receiver and the gaslift manifold at Njaba location as per drawing. Fabrication and Installation of vent stack, vent manifold and associated instrumentation and piping items in accordance with the attached drawings as shown on the attached drawing list. Installation of test separator (MBD-110), the hook up to the manifold and the piping for tie-back into the bulk line, fabricate all associated piping and instrumentation items. Installation of fuel gas scrubber and associated instrumentation and piping items. Installation of wellhead control panel and associated instrumentation and piping items as per attached drawing. Drop protection shall be provided for the wellhead control panel. 	Addax Petroleum	March, 2018	Completed	NJABA	<ul style="list-style-type: none"> Felix Agunu (Addax)
